

6/2/2020

Refer to the schedule below for upcoming Healthcare Clinics including Osteoporosis Screening, Healthy Heart Screenings and Diabetes Screening. Our Osteoporosis screening uses Ultrasound technology to assess one's risk for this condition. Our Healthy Heart screenings offer a risk assessment for heart disease, a lipid-stick profile test, and a blood pressure check. Our Diabetes screening uses an A1c test. This is a measure of your average blood sugar over the previous 3 months. This test requires only a small amount of blood and no fasting. All screenings are available at the pharmacy for FREE. Thank you.

ALL HEALTH AND WELLNESS CLINICS ARE CANCELLED UNTIL FURTHER NOTICE DUE TO COVID-19. WE WILL CONTINUE TO ASSESS THE SITUATION AND PROVIDE UPDATES AS THEY BECOME AVAILABLE. STAY HEALTHY AND STAY SAFE.
